The first section I always turn to when I get a new issue is the 10 Minute Tech section. I have gotten so many tricks and ideas from reading this section that there are too many to name. And then to now have a WHOLE BOOK of ideas and suggestions is too good to be true. I own volume 1 and volume

3 already. You will enjoy reading this book and I am CERTAIN that you will get many great ideas as to how to solve problems, fix small things, and to make your camping experience even more fun and simple. Get ALL of these books!

We are new to RVing and have bought two of these books, they are full of great ideas and even if you don't use them it helps in understanding the issues involved in making your RV more comfortable and usable. Recommended

An RV isn't a home until those changes, upgrades, and small-scale fixes have been made that put a personal stamp on it. 10-Minute Tech, Volume 2 shows that this process need not be fraught with difficulty or drama. Aimed at both the RV novice and the seasoned pro, the information here is drawn from Trailer Life and MotorHome magazines Quick Tips self-help column, written by and for RVers and based on actual experience. The book contains little-known tips that RVers shouldn't live without and hundreds of illustrations and line drawings to make changes easy. Arranged in a straightforward reference format for easy access to particular problems, 10-Minute Tech provides the no-nonsense advice readers have come to expect from this series.
