Aurora Fernandez Per, Javier Mozas, Alex S. Ollero : 10 Stories of Collective Housing by A+t Research Group before purchasing it in order to gauge whether or not it would be worth my time, and all praised 10 Stories of Collective Housing by A+t Research Group:

0 of 0 people found the following review helpful. Three StarsBy wfHelpful.0 of 0 people found the following review helpful. Good combination of images and analysisBy gbA very good combination of images (drawings, photos, etc.) and textual analysis. Comprehensive re: the projects the authors chose to review.

"A superlative example of how well-organized and stunning graphics can allow for comparisons between projects". Richard Dattner, Architectural Record For the first time ever, a+t research group has conducted an analysis of ten inspiring masterpieces through drawings and texts highlighting the most important contributions made by each of the

architects towards developing desirable housing. The book recognizes masters such as Ignazio Gardella, Jean Renaudie, Ralph Erskine and Fumihiko Maki, among others, who defended their own personal vision of architecture, a far reach from dogmatism and closer to users. Each story is a journey through multiple possible links which relate the project with works that preceded it, set it against those of its generation and match it up with recent 21st century designs. This is neither a canonical list of buildings nor the top ten of collective housing. They were chosen as one chooses one's friends. Faults and all, they make everything worthwhile.

"It really sets a completely new standard in architectural publications". Florian Heilmeyer, *Uncube* magazine "A must-have", "a really cracker book". Stuart Harrison, *The Architects* radio "This exciting work delivers a careful analysis of community housing, dissecting 10 projects in a clear and informative manner through a historical, political, structural and aesthetic lens. Of particular interest to younger generations is the question of preserving the spirit of previous large-scale experiments, and learning from their varying fortunes. A reference work in its field, which is beautifully produced". dith Hallauer, *L' Architecture d'Aujourd'hui* "Impressive documentation of near-forgotten master works from last century - on the thoughts of Ralph Erskine, Mosei Ginsburg, Fumihiko Maki which live on in their buildings". Baumeister "What helps make 10 Stories so good is the selection of projects, which is not nearly as obvious as it could have been". "This book offers something for everybody, with plenty to learn in the thorough case studies that many of the best ideas in housing have already happened". John Hill, *A Daily Dose of Architecture*
