before purchasing it in order to gage whether or not it would be worth my time, and all praised 101 Shade-Loving Plants: Ideas to Lighten Shadows (Gardeners' World Magazine 101):

I haven't bought any of the plants suggested yet as I'm still doing some research to determine which ones I want, but this book is very helpful. Big color pictures, too, which most gardening books seem to lack.

Few gardens have constant sun, but this doesn't mean they have to be gloomy. Even the most shaded gardens can be full of color and variety. Packed with expert instruction on planting and aftercare, and full-color photography displaying each flower idea, 101 Shade-Loving Plants is full of diverse ideas to suit all gardens. Banish the dark from shady places once and for all.
