Throughout the book are images and descriptions of their home that could make the most content reader jealous. Page after page, the story unwinds of the house that consumed the authors as they lived out their dream board by board, nail after nail. Once you are fully in love with what they have done with the home, you get to visit the gardens. Full of amaranth and iris, this garden charmed and delighted through the page. I can only imagine how wonderful it is in person. I always love a good love story with a house and this one is especially beautiful. You don't want to miss it.[...]A House in the Country6 of 8 people found the following review helpful. Great text/pictures and so glad to have made this purchaseBy Paul T. What a fantastic book. I thoroughly enjoyed reading the entire book. The interior is fascinating and I found myself flipping back to the floor plan while reading about each room. The decorating is beautiful and I love the use of color, and the architectural details are fantastic. I didn't think it could get better than the interior of the house but I loved reading about her gardens. I could relate to her notebooks, overplanting, and desire to try so many different plants. I am looking forward to our first spring flowers.

Nestled amid the lush, gently rolling hills of cattle and horse farms in Millbrook, New York, is a handsome Greek Revival house that looks like it's always been there. In fact, it is brand new—the collaborative effort of architect Peter Pennoyer and his wife, interior designer Katie Ridder. This irresistible book, exquisitely illustrated with photographs, finely rendered plans, and hand-painted illustrations, tells the home's story. The design followed Pennoyer's conviction that historical examples are a springboard for the imagination and offer compelling solutions for new architecture. So, though many characteristics of the house are classical, and, more specifically, Greek Revival, it is also thoroughly contemporary and environmentally friendly, with an exuberantly colorful interior. Of equal weight to the house's interior and exterior design is the fabulous landscape. A passionate, self-taught gardener, Ridder brought her design talent to the creation of the home's garden, inspired by an English cottage garden, with a lush, dense mix of more than 200 perennials, annuals, rare plants, shrubs, and bulbs. The book features a gatefold pullout of the garden plan, complete with a comprehensive key to flowers and plantings.

"See how architect Peter Pennoyer and his wife, designer Katie Ridder, created a contemporary home with a classic look in this beautifully illustrated book that offers compelling insights for new architecture."
