Robert Knight : A House on the Water: Inspiration for Living at the Water's Edge before purchasing it in order to gage whether or not it would be worth my time, and all praised A House on the Water: Inspiration for Living at the Water's Edge:

0 of 0 people found the following review helpful. TimelessBy Nightly readerA book I go back to often for building and decorating ideas.5 of 5 people found the following review helpful. ArchitectBy S. GaddaI found this book both educational and handsome in content and in photography. As an architect practicing in different regions of the country, I'm always thankful for having opportunities to do design work in Maine. Maine, as a place to live, is simply wonderful and unique, but the sense of peace in these "Houses on the Water" is elevated creating a noble inspiration for the reader.0 of 0 people found the following review helpful. Four StarsBy Pegasusgreat pics

People are naturally drawn to water, both for recreation and relaxation, and a house on the water is an almost universal desire. But building that house poses design and construction difficulties that few subdivisions can match. Site conditions are often problematic - rocky, hilly, sandy - and the house is constantly exposed to sun, wind, salt, sand,

and storm. A suburban home can't withstand those challenges. So what will? In *A House on the Water*, Maine architect Robert Knight distills his years of experience designing waterside houses into six distinct themes which take into account the needs of both interior and exterior. Over 300 color photos and numerous floor and site plans showcase 24 homes built to withstand conditions specific to the site, blend seamlessly with the native architecture, and both respect and enhance their place on the water.

"Emphasizing the ways good architecture affects perception and mood, Robert Knight offers valuable lessons in how to create a waterside home that embraces both its site and its occupants." "Emphasizing the ways good architecture affects perception and mood, Robert Knight offers valuable lessons in how to create a waterside home that embraces both its site and its occupants." About the Author Knight is an architect. He is the principal and founder of Knight Associates in Blue Hill, Maine.
