John L. Feirer, Gilbert R. Hutchings : Advanced Woodwork Furniture Making before purchasing it in order to gage whether or not it would be worth my time, and all praised Advanced Woodwork Furniture Making:

The pictures are a bit outdated but the information is great. 6 of 11 people found the following review helpful. Don't waste your money - very old and VERY basic. By Bernie Bernbaum This is a miserable book. The technology displayed in the book is extremely old - maybe 40-50 years old - the original copyright is 1954. The furniture displayed is of similar age. And while the book is titled "Advanced Woodwork and Furniture Making", the book is *extremely* basic - unless you're a complete beginner, you're already way beyond the information in this book. An absolute waste of money.
