2 of 2 people found the following review helpful. A well-written little bookBy RichardThis well-written little book of essays is a pleasure to read and hard to put down. With humor and a sense of innocence and wonder George Platz describes the skills he had to learn or invent to embrace his life as a weekend farmer, from surveying the property with a stick, a string, and a dime-store compass, to building roads and bridges, to cutting, splitting, and hauling firewood, to tapping sugar maples, transporting the sap, and building a sugar house to boil it into syrup. And much more. The

essays carry us through a dawning appreciation of the fields and woods and wild ravines and the need to preserve them for future generations.0 of 0 people found the following review helpful. Five StarsBy CD KAPPperfect

The author, a Chicago lawyer, has for more than 30 years owned a southwestern Michigan farm that he and his wife have used as a weekend retreat. The essays in this book relate their experiences in acquiring, learning about, and enjoying their part-time rural life. This book will be of special interest to other city dwellers who have considered a similar escape.
