**Richard W. Harris : Arboriculture: Integrated Management of Landscape Trees, Shrubs, and Vines 4th (fourth) edition** before purchasing it in order to gage whether or not it would be worth my time, and all praised Arboriculture: Integrated Management of Landscape Trees, Shrubs, and Vines 4th (fourth) edition:

0 of 0 people found the following review helpful. bookBy Kevinwhat you would expect, nice book0 of 0 people found the following review helpful. Five StarsBy CustomerGreat product for a great price!43 of 44 people found the following review helpful. The BookBy Paul D. WestHarris wrote the first edition of this book when trees were "trimmed" by the same people who patched asphalt and repaired park benches. It was a breath of rationality in a field that relied mostly on anecdotal information.The new edition reinforces this work as the compendium of current thinking about how to care for trees. Clark and Matheny build eloquently on Harris's solid foundation.The public participates actively in caring for trees and demands to know information found in this book. Why not plant the biggest caliper tree you can find? Can't you do something about the tree roots "breaking" up my sewer? Open the book and show them the brief but definitive answer that is easily found here.I wish more citizen tree advocates would read

this book. For that matter, I wish more arborists would too.
