**M. David Egan, Victor Olgyay : Architectural Lighting** before purchasing it in order to gage whether or not it would be worth my time, and all praised Architectural Lighting:

0 of 0 people found the following review helpful. Somewhat Outdated BookBy NYC Book BuyerThe version of the book that I bought was written in 1983 and is somewhat outdated. Many new types of lighting are not included (T8 flourescent, T5 flourescent, LED, etc.). Also this book is entirely in black white, so in discussions of color topics, such as the Munsell Color System, black white illustrations don't make sense.However for learning the basics it is OK.0 of 0 people found the following review helpful. Four StarsBy MansourCool diagrams0 of 0 people found the following review helpful. fine.By Fayi have bought one before, If you have only one product, this is the one to have the price is cheap and the quality is high. great and good experience. very fast, receive it next day.

Extensively revised, this Second Edition offers architects and designers the most current thinking and practice in their

profession on the scientific properties of light, the uses of natural and electric light in buildings, lighting effects and applications, and design tools and processes. To help the reader on the job, there is full coverage of lighting calculation methods, including the Lumen Method, as well as a number of useful CAD and computer rendering solutions.
