**Judy A. Juracek : Architectural Surfaces: Details for Artists, Architects, and Designers (Surfaces Series)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Architectural Surfaces: Details for Artists, Architects, and Designers (Surfaces Series):

0 of 0 people found the following review helpful. Five Stars By John M Eddy Loved it! 0 of 5 people found the following review helpful. Not suited for my purposes By Joe Avatar The book sounded great. However, I wanted to get ideas for residential design: doors, columns, ceilings etc. The book is a compilation of photos taken across a myriad of environments. The vast majority are exterior shots. I wanted many interior shots. Very disappointed that now I have to pay return shipping for a product that was not well described. I suggest develop some type of categorization system to aid the buyer to determine suitability of purpose. If could do that, pure genius. 9 of 10 people found the following review helpful. Pictures to give Ideas, Pictures to show Clients By John Matlock This is a picture book for architects to

illustrate various treatments, hundreds of various treatments for surfaces. Surfaces includes walls, facades, ornaments moldings, columns posts, windows, doorways, ceilings roofs, floors pavement. The concept is to show what has been done by others which can help in filling out their ideas about projects. And it is useful in showing or asking clients for their comments on proposed treatments. All in all there are some sixteen hundred photographs in the 350 or so pages of the book. The overall design of a building is the first thing that is noticed, but the surface treatment isn't far beyond. And unlike the design, the surfaces from the floor to the ceiling are covered in paint, carpets, drapes, dozens of different treatments. All in all, the surface finishing may be the most expensive part of the building. This is a reference book that belongs in any architectural library.

The latest addition to the acclaimed Surfaces series catalogs hundreds of different architectural elements and materials. This new collection contains over 1,400 high-quality color photographs capturing a range of details and surfaces, organized by architectural elements: walls, facades, windows, doorways, ceilings, roofs, floors, pavements, columns, and arches. Architectural Surfaces provides a wealth of source material to meet the research needs of architects and interior designers, artists, scenic designers, and graphic designers. CD-ROM included: screen resolution scans in easy-to-use JPEG format for Mac and PC. 1600 color photos
