International Association of Homes and Services for the Ageing : Architecture for an Ageing Population before purchasing it in order to gauge whether or not it would be worth my time, and all praised Architecture for an Ageing Population:

0 of 0 people found the following review helpful. Excellent study on senior cohousing By ArchyThe International Association of Housing and Services for the Ageing studied hundreds of new, recently occupied and newly proposed senior housing developments around the world and they featured in this publication their favorite twenty-three. Checkout what this team of gerontologists and senior housing specialists, and quality senior housing advocates thought were the best to be found in comfortable, appropriate, and responsive living arrangements for seniors worldwide. Six of their favorites are by McCamant Durrett Architects (MDA). Too much senior housing is institutional. MDA tried to make six communities just a new and improved version of home and a high-functioning neighborhood. The 345-unit

project of Rincon Del Rio is considered the first village-like CCRC in the country outside of a real and traditional village. 0 of 0 people found the following review helpful. Beautiful Large Book with Great Photos By Sue Smith Beautiful photos and plans with great ideas for senior communities. I especially loved the cohousing photos!

This compilation of more than 30 outstanding projects in the areas of assisted living, continuing care retirement communities and nursing homes represents the best current work designed by architects for the ever-increasing population of the ageing and elderly. Produced by IMAGES Publishing in association with the IAHSAs, Architecture for an Ageing Population complements the successful Design for Aging series. Each project is presented with photographs, detailed plans and statistics, illuminating the high level of research, planning and community involvement that goes into these advancements in living environments for seniors. This comprehensive review of architectural design trends in aged-care facilities will appeal to aged-care providers, developers, users, and advocates, as well as architects, interior designers, landscapers and other design professionals.
