**Oscar Riera Ojeda, Mark Pasnik, Photography by Paul Warchol : Architecture in Detail: Materials** before purchasing it in order to gage whether or not it would be worth my time, and all praised Architecture in Detail: Materials:

0 of 0 people found the following review helpful. Five Stars By Jay Ewing Great book if you need to study more info material detail  
0 of 0 people found the following review helpful. Very nice book. Highly recommended By DLIN Very nice book. Highly recommended  
0 of 1 people found the following review helpful. The best materials book you could find By Zoia Zaharinoval I bought this book simply looking for an addition to my architectural library, but I fell in love with it. I never imagined the flexibility of materials before I picked up this book. I strongly recommend it.

Materials is the first book in the Architecture in Detail series, which examines a wide spectrum of architectural palettes from traditional products used innovatively to the testing of newer substances and from elegant applications of inelegant materials to experimentation with unconventional construction practices. Each photograph demonstrates the

capacity of details to be mesmerizing expressions of quality and craft through techniques of pattern, texture, color, and surface. Together, all these characteristics ingeniously contribute to the vitality of the architecture surrounding them.

About the Author Oscar Riera Ojeda is an editor and designer. He is the creator of many architectural books including the Single Building series, Ten Houses series, Contemporary World Architects series, and Architecture in Detail.
