**John Tampion, Maureen Tampion : Attracting Butterflies to Your Garden** before purchasing it in order to gage whether or not it would be worth my time, and all praised Attracting Butterflies to Your Garden:

The colorful presence of butterflies adds charm to every garden. This beautifully illustrated volume, focused on temperate climates around the world, provides all the information necessary to create a backyard haven for these delightful insects, including butterfly lifecycles, foods, and preferred habitats for breeding and hibernation. A bonus chapter on the art of photographing butterflies will turn even the most dedicated gardener into an enthusiastic shutterbug.

About the Author In 1990, John and Maureen Tampion started their own butterfly and plant photographic library, agency, and consultancy. Their tropical plant and butterfly greenhouses have been featured on TV as well as in newspapers and magazines.
