I saw that she bought some tool and has prepared the land as it was described in the book. The book is well written and detailed and has good information all in one. My mum is happy that I got her this book and she will be using it for reference. I highly recommend this book to all that have interest in farming and more especially backyard farming. Rich information, thanks to the author for sharing this information. 0 of 0 people found the following review helpful. ... several months now and I really need a book like this to educate me with new knowledges to keep ...
