**Michael Lavelle, Christine Lavelle : Backyard Wildlife: How to Attract Bees, Butterflies, Insects, Birds, Frogs and Animals Into Your Garden** before purchasing it in order to gage whether or not it would be worth my time, and all praised Backyard Wildlife: How to Attract Bees, Butterflies, Insects, Birds, Frogs and Animals Into Your Garden:

2 of 2 people found the following review helpful. Good projectsBy Foodie fanEven though this is a UK based book working in zone 6 7. (I believe). Projects are useful for the USDA zone 5 in which I reside. A good companion book for Douglas W. Tallamy's "Bringing Nature Home", which is the most useful book in my library of building wildlife habitats so far. These books are foundation books to attract and house and feed the herbivor population that feeds and supports the mammal community which was my aim in the beginning.

Practical instructions for plantings that welcome wildlife, with projects for bee-boxes, bird feeders and more.

About the Author Christine Lavelle is a lecturer in horticulture and ecology at Writtle College, Chelmsford. She trained at the National Trust for Scotland's Threave School of Practical Gardening and the Royal Botanic Gardens in Kew. Christine was assistant head gardener at Levens Hall topiary gardens in Kendal. Michael Lavelle has designed and constructed several exhibits at the Chelsea Flower Show, achieving gold medals in 1999, 2003 and 2005, and winning a silver medal for his specialist wildlife garden in 2007. He is currently a senior lecturer in landscape management at Writtle College, Chelmsford.
