**From Brand: Donald J Berg : Barns and Backbuildings: Designs for Barns, Carriage Houses, Stables, Garages Sheds with Sources for Building Plans, Books, Timber Frames, Kits, Hardware, Cupolas Weather Vanes** before purchasing it in order to gage whether or not it would be worth my time, and all praised Barns and Backbuildings: Designs for Barns, Carriage Houses, Stables, Garages Sheds with Sources for Building Plans, Books, Timber Frames, Kits, Hardware, Cupolas Weather Vanes:

1 of 1 people found the following review helpful. Paid too much!By Scott emminsThe book is basically a catalog of plans. For the \$49.95 I paid I thought it would be more. \$9.95 was the price that was printed on the back cover0 of 0

people found the following review helpful. Arrived quickly, book in perfect shape, but content not what I had in mind  
By Jean McKern  
Examples of barns a bit redundant. A few styles reworked again and again. Not as much variety as I had in mind. Very good list of resources and connections for specific needs, however.  
0 of 0 people found the following review helpful. rather dated book  
By 3 horsesthis book has a lot of good points, but needs to be updated for today's horse keeping. The barns are mostly quite old and would not be built today

A complete guide to great backyard buildings with ninety four designs of barns, stables, garages, sheds and garden structures; plans that you can purchase directly from their designers; a directory of hard-to-find building products, guide books, kits, timber frames and prefab buildings; and good advice on site planning and construction.

A must book if you are planning construction of a small barn. -- The Barn Journal, On Line, April, 1998  
Charming Outbuildings -- The Baltimore Sun Excerpt. Reprinted by permission. All rights reserved.  
Barn's aren't history. There is a community of incredibly talented craftsmen, designers, authors and builders who make their living working on barns. There are people who hand-forge beautiful iron strap hinges and others who design cupolas and whimsical weather vanes. There is a guild of professional framers who practice the ancient craft of carving trees into post and beam frames. Some of them are preserving hundred year old heritage barns that have gotten in the way of progress. They carefully take apart the timbers or logs and rebuild them on new sites where they will serve for another few hundred years. There are new building guide books, historic associations and museums, magazines and great internet web sites. Every architect, designer and builder seems to have a barn or two in the works, in the files, or at least in their thoughts. If you're planning to build a barn, stable, garage or shed you'll find designs, designers, and sources for specialty material. If you're restoring an old barn or carriage house, you'll find folks who can help as well as authentic hardware and supplies.
