This book provides a basic, partly unconventional, guideline for sustainable, ecological, organic gardening in tropical and subtropical climates. As the title hints at it you will find in this booklet about THE BASICS OF SUSTAINABLE, ECOLOGIC, ORGANIC AGRICULTURE IN THE TROPICS the information you need to successfully run a small self-sufficient garden or to manage a profitable ecologic organic agricultural operation. After the lecture you will have a lot of new essential information, insights and ideas that you wont find in this concentrated way in any other script. This booklet may be the foundation of your personal success story.
