Almost as much fun as the actual bird watching!By Nanette KinslowI received a flashy advertisement about this book that make it sound so fun, but very pricey. After checking for a used copy I found it for a fraction of the price, but this book would have been worth it even at the flashy price. From the moment I opened the cover I was pleased. I quickly read the book from cover to cover and found it

completely engaging. I own several books on birding that I pick up now and again when I would see an unusual bird at my feeders, or plan for the spring enjoyment of my yard in the dead of winter, but have never been moved to read an entire text. Since reading this book and enjoying the peaceful pencil sketches I have been moved to go from two feeders to a full bird garden. It inspired me to construct a platform table, add bowls of grape jelly and meal worms to my feeding menu and has given me a more delightful approach to a now even more enjoyable hobby. This may not be a bible for the expert, but if you feed and watch birds for pure pleasure and would like a fun and informative book to inspire and entertain I highly recommend this book! 3 of 3 people found the following review helpful. Amazingly Diverse, Relevant Entertaining Content - A Great Reference Book By Smuggler Loaded with content about birds, feeding birds, bird feeders, identifying birds, landscaping and planting for birds and so much more. Great thing about this book is you can read it front to back - but I find myself picking it up and opening it randomly to read something new and different every day. It's one of those rare books that you'll actually wear out over time, from reading for pleasure and referring to it as a reference work. This one is a home run. 2 of 2 people found the following review helpful. Backyard Birding Tips has Everything By Pam I received this book in perfect condition and right on time. I'm a beginning birdwatcher, my upcoming retirement hobby. This book has what you need to know about the best ways to attract birds, how to deal with pesky food stealers (like squirrels), how to make things yourself (like feeders), what specific birds like to eat, where to put your birdbath or feeder, and we can go on and on. It's easy to understand and lists facts and fiction all about birds.

Grab a front row seat for the sights and sounds of feeding, nesting, and bathing birds right in your backyard using these tips shared by experienced birders. Whether the aim is to attract tiny hummingbirds or large and raucous blue jays, or lay out the welcome mat for temporary visitors stopping in during their seasonal migration, Best-Ever Backyard Birding Tips by Deborah L. Martin explains how to play up various landscape features and how to appreciate what happens in the backyard "birdscape." The book targets all skill levels, offering new birders a few basics while intriguing longtime birders with new ideas. Here readers will learn: -why moving water, even a single dripper, will make a difference in which birds visit the yard -how to plan an entire bird garden that offers food, shelter, and water for bathing and drinking -what seeds and foods appeal to birds at different times of the season -how to attract new species of birds no matter which region of the country they live in -what type of shelter keeps baby birds safe until they are ready to leave the nest Birders will enjoy reading features such as "Everybody Wins" (birding practices that benefit nature and the environment) and "Budget-Wise Birding" (free or inexpensive ways to feed and attract birds). They'll also find step-by-step illustrations for installing a water feature, building a simple tray feeder, and converting a craft-style birdhouse into a suitable residence.

About the Author Deborah L. Martin is a freelance editor and writer who has made appearances as a gardening expert on HGTV and elsewhere. Previously she spent more than a decade at Rodale as a garden book editor and was the project editor for The Backyard Bird Feeder's Bible and Stokes' Backyard Bird Book. An avid amateur birdwatcher, she lives near Allentown, Pennsylvania.
