Richard Nunally, Laura Peters, Richard Nunnally : **Best Garden Plants for Virginia** before purchasing it in order to gage whether or not it would be worth my time, and all praised Best Garden Plants for Virginia:

2 of 2 people found the following review helpful. little information and less that it wants to beBy Sonja Corterithe book is called best garden PLANTS for virginia but that is the first misstatement of this publication. Among other things it leaves out Vegetables and fruits entirely.The blurb on the back calls it practical and inspiring and it is also not that at all.It is not practical, because it doesn't even give you as much information as can be found on teh back of a

seedling package in various instances. It also doesn't even mention anything about the plant's toxicity, which is a necessary information for garden plants if you have children. Inspiring? It is an incomprehensive list of plants which may or may not grow well in Virginia's versatile terrain and the writing is as inspirational as the back of an unimaginative seedling package. I don't doubt that putting this thing together was quite some work for the people involved and finding pictures of all the plants from stock (because they are sure not all actually been taken for this book) will have been a challenge BUT it would have taken little more than what they had done to turn this book into something really useful I fear the *writers* were held hostage by the format which would have been served better by smaller pictures and more information. I am thoroughly disappointed. 0 of 0 people found the following review helpful. GREAT By Judith Holder I love this book. I am not a gardener but this book tells me the things that grow best in my state, Virginia. It tells you how big the bush, vine or tree will grow, what area to plant it in, and how to prepare the soil. Color pictures and it's latin names. Choked full of good information. I use it often. 0 of 0 people found the following review helpful. 5 stars By George Cataldi Totally pleased

A great new gardening book for Virginia! This handy guide is packed with the best plant varieties you'll want for your garden: annuals, perennials, trees and shrubs, vines, roses, bulbs, ornamental grasses and herbs. Small enough to take to the garden center or nursery, yet filled with beautiful photos, it contains all the gardening information you need to decide which plants to select and how to care for them. Includes information on habitat, height and spread; plant features and flower colors; information on soil, light and water; and tips on best use of the plant in your garden.

About the Author RICHARD NUNNALLY is a well-known and beloved gardening personality in Virginia. He is host of WCVE TV's gardening show Virginia Home Grown and is a gardening columnist with the Richmond Times-Dispatch. He also works as the Extension Agent Emeritus with Chesterfield County. LAURA PETERS is a certified master gardener with more than 16 years of experience as a retail gardening consultant. She also has researched and written nineteen gardening books. Her practical knowledge of contemporary plant varieties and gardening products covers almost every aspect of the horticulture industry. Her areas of interest include roses, alpine and exotic perennials, as well as Japanese and indoor gardening.
