A great way to get motivated to tackle a space, is by looking at what others have done with their space. It does have many innovative ideas on how to redesign 'traditional' furniture and make use of existing space as much as you can. But if you're looking for a detailed 'How to' of putting this colour with that shade then this may not be the book for you. All in all it is a very good reference book especially if your aim is to make custom furniture for your small space. 0 of 0 people found the following review helpful.
