I am not a professional electrician, plumber or contractor; but I am confident in my skills and comfortable with taking on most tasks. Having a multi-subject guidebook to check the codes and proper configurations is indispensable. Swapping out a 40-60 year old 3-way light outlet, and all the switches, to a 4-way configuration is not something I do every day. This book provides great

guidance and excellent drawings of every configuration I needed in my home.0 of 0 people found the following review helpful. Codes for HomeownersBy Conrad DuBoisCodes for has many codes for homeowners in this book. There are codes for building that are illustrated which are valuable when you are building a house. Then there are plumbing codes to follow when you are doing a plumbing remodel in your home. There are electrical codes which are very helpful for doing an electrical job on your house inside or outside receptacles. There are heating and cooling codes in this book also. This book is well illustrated for the homeowner so you can see the right way to do the job. I was in the process of an electrical update so the part on electrical codes is why I bought this book. This was very helpful while I was doing my project of adding lights and receptacles. I would recommend this book to anyone!! Better to do it right now than have problems later!!0 of 0 people found the following review helpful. Five StarsBy Al K SeltzerGood to have I guess, if I am going to do any home improvement in the future.

Codes are a fact of life for do-it-yourselfers, but getting good information on codes can be a nightmare. Anyone who has ever opened a code book (or even a code interpretation book) looking for the answer to a building, wiring or plumbing question has found the same thing: a lot of arcane, technical words and cross-referencing, pages of meaningless charts, but no information that make sense. Codes for Homeowners combines decades of experience by author and IRC-certified home inspector Bruce Barker with Creative Publishings famous studio photography, and the result is the first truly clear and easy to use codes reference book for homeowners and tradesmen alike. Current with 2009 International Residential Code (IRC).

About the AuthorBruce A. Barker is president of Dream Home Consultants, LLC., a Cary, North Carolina based building inspection and consulting firm. He has built or inspected more than 3,000 homes during his 29 years in the construction and building inspection industries. Mr. Barker is a Residential Combination Inspector, certified by the International Code Council. He is also a licensed contractor in Arizona, Florida, and North Carolina.Mr. Barker is a member of the American Society of Home Inspectors (ASHI). He currently serves on the Board of Directors after prior service as chairman of the Society's national Standards of Practice Committee. He is also vice president of the North Carolina ASHI chapter. Mr. Barker is a frequent contributor of technical articles to ASHI Reporter, Home Energy, Builder News, and other publications. Mr. Barker is also a member of the International Code Council.Mr. Barker graduated cum laude from the Indiana University School of Business with a degree in accounting. He also graduated from Indiana with an MBA in information systems and studied law at the Indiana University Law School. He is a member of the Beta Alpha Psi and Beta Gamma Sigma academic honor societies. Mr. Barker spent his early career as a consultant with Peat Marwick (now KPMG), an international public accounting and consulting firm, and as the owner of one of the first computer stores in the Midwest.
