Replacing old trim moldings or installing decorative trim accents can change the look of a home almost as dramatically as a major remodeling job, and at a fraction of the cost. Black Decker The Complete Guide to Trim Finish Carpentry is aimed at growing numbers of DIY homeowners who are replacing trim and decorative moldings as a comprehensive remodeling project on its own merits. The book shows how style makes the house, and teaches do-it-yourselfers how to effectively choose, finish and install all manner of trim moldings, from ornate baseboards to decorative crown moldings and ceiling medallions. It also includes an update on how to select and work with the new materials now gaining in popularity, including rigid fiberglass moldings and metal ceiling panels.
