Being a lover of books I found it intriguing especially since I could see what a lot of them read. The author gives you a lot of great ideas on ways to store books and the comments are very interesting. What I would loved to have seen is more pictures of regular folks' libraries or collections. A lot of these pictures is of apartments or homes with about an acre of room. I have to stick them anywhere theres a space and doesn't make the wife mad.12 of 13 people found the following review helpful. books make a homeBy rascal's momI have several books in my library about decorating with books. I enjoyed"Books Make a Home" because the author is a lover of books in addition to being a designer.The text was interesting and informative and the [pictures were beautiful. My own design preference is traditional but I enjoyed all of the styles represented in the book, because of the way the books themselves personalized them. Very well done.1 of 1 people found the following review helpful. I liked itBy kitty katIt's a nice book. A lot of full page color photographs, some with just a few books, however (which was kind of

funny). Nice paper. The book is broken into chapters...bedroom, living room, hallway, kids rooms, etc. Different home and bookcase styles...something for just about everyone. It was interesting and a bit of information on how to take care of books was included as well.

Books fulfil myriad functions in our lives. They provide information, foster our enthusiasms and spark our memories. But these personal treasures also add colour and a true sense of personality to our homes. *Books Make a Home* explores the important role they play as Decoration, as well as functional items.
