Charlie Minton : Build a Beach Hut for Your Garden before purchasing it in order to gage whether or not it would be worth my time, and all praised Build a Beach Hut for Your Garden:

A beach hut in your garden! The brightly-painted British beach hut is as essential to the British coast as sandcastles, deckchairs, flimsy windbreaks and ice cream. In recent years the growing nostalgia for these popular little buildings has made them rocket in price. But if you have the space in your garden, there is little to stop you from building one yourself. These attractive extensions to your living space can be used as a workshop, study, office, changing room (if you have a pool and even if you don't). In fact, there are even commercial uses such as entry kiosk, site office, snack bar, storage, shop ... and many more possibilities. And they are so much more delightful to look at than a plain old garden shed, and are generally sturdier. This little book includes a plan for a typical promenade design of approx. 12 feet long and 8 feet wide, with pitched roof and covered veranda. The design uses strong methods of construction and

can be tailored to suit your own sizes. With cutting and materials lists, suggested tools and over 100 illustrations, this is a must-have for anyone who fancies a touch of the seaside at home.

About the Author CHARLIE MINTON (nicknamed "Chippy" by his friends) has spent many years in woodworking, DIY and hardware. His father, and his father before him, were master joiners. Working from a converted garage containing a large collection of woodworking gadgets and machinery, he has made wooden toys and reproduction antique furniture commercially. A keen user of power tools, he also practices traditional woodworking techniques when restoring period antiques and making reproductions. He lists his hobbies as reading woodworking magazines and worrying about his growing pile of offcuts that he can't bear to throw away.
