**Kathy Biggs : Build a Pond for Wildlife - CD-ROM** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Build a Pond for Wildlife - CD-ROM:

1 of 1 people found the following review helpful. Wonderful book! By RG This book is wonderful! We have followed the steps outlined and we're very happy with our pond. I saw a negative post from someone and also noted Kathy Biggs' response. I do hope that person will delete her review because it really affects an author's image. It looks like the author had actually given her contact info right on the book and is also available on the website and that she's happy to replace the cd. 2 of 2 people found the following review helpful. A Great way to help Wildlife! By Ann After attending a workshop on building wildlife ponds by Kathy I bought the book and built my pond! It is easy to read with good instructions and photos. If you have space, buy the book and build a pond. You and wildlife will truly enjoy it! 0 of 5 people found the following review helpful. No water in the pond. It doesn't exist. YET By Sharon B. Marshall I was very interested in viewing this CD as I had recently read an enjoyable article by Kathy Biggs who happens to live locally. Unfortunately I have been unable to open the disc on either of our two computers. I tried to look up her number to call for a possible replacement but that was to no avail as well as I did not find a number for her. Perhaps you, () could do that for me as I would love to catch some of the abundant rain we have been having of late. I will refrain from rating this CD until or unless I can get a replacement which works. Thank you, Sharon Marshall

. Building a pond for wildlife is just the natural thing to do! Choose to enhance the world! Learn how to create a pond built for wildlife, not tropical lilies and exotic fish! Give yourself the dual pleasures of the tranquil, restive enjoyment of a garden pond plus the opportunity to observe your local wildlife, up close and personal. This CD-ROM contains two PDF files, both in full color. The first file is a "cover" and the other a 32-page article in 4-parts on Building Ponds for Wildlife by nationally recognized wildlife pond presenter Kathy Biggs. CD opens PDF files which work on both

Macs and PCs. Read on your computer screen /or print out, your choice!
