**Penny Swift, Janek Szymanowski : Build Your Own Outdoor Structures in Wood (Build Your Own Series)**  
before purchasing it in order to gage whether or not it would be worth my time, and all praised Build Your Own Outdoor Structures in Wood (Build Your Own Series):

Build a playhouse for the kids, an attractive storage shed, a greenhouse on your patio for year-round use--even a guest cabin or cottage. All these projects and many more come from two basic methods for building with wood: pole structure and stud-frame structure. Both are clearly explained here, shown in exact detail, with full-color photos of every step for every aspect, from concrete slab and wood floors to walls, windows, and doors, to the roof and the

finishing touches. 64 pages (all in color), 8 1/2 x 11.
