[Kindle Edition] by Dale Evva GelfandBy CDP's Onceagain habit of purchasingI purchased this Kindle Digital offering of "Building Bat Houses" by Dale Evva Gelfand : Storey's Country Wisdom Bulletin A-178, to learn as much as I can about this noble effort to support Bats and their attraction to my area. There are small southern bats in the evening here and I know they will stay around if given someplace to live and propagate. Yes, they have bad reputations for disease, but that is mostly false information from the ignorant. These little guys remove hundreds of flying insects each, every night they fly around my neighborhood and that is so much better than the spraying trucks that fog the air with poisons. You can help by providing shelter for them to hang out in your trees, on the shady side of your house or barn. Help them and they will help you. Good building and helping these little guys.0 of 0 people found the following review helpful. Great book and sellerBy GKWe just moved from our completely remodeled California home to a "fixer-upper" in Georgia and are starting all over again inside and out and I was curious to know what kind of animals are in this area. The book is beautiful and full of wonderful information. We are putting up several bat houses as we already have two in our work shop. Need the bats to eat all of the Mosquitos at up too 1,000 of them an hour. The book is beautiful and full of wonderful information. Arrived sooner than expected and wonderfully packaged. Highly recommend product and seller! Arrived sooner than expected and wonderfully packaged. Highly recommend product and seller!0 of 0 people found the following review helpful. This book is not pretty, but usefulBy TessiejenThis book is not pretty, but useful. It's also small, but I expected that for the price and after reading others comments.
