John Vivian : Building Fences of Wood, Stone, Metal, Plants: Making Fence with Wood, Metal, Stone and Living Plants before purchasing it in order to gage whether or not it would be worth my time, and all praised Building Fences of Wood, Stone, Metal, Plants: Making Fence with Wood, Metal, Stone and Living Plants:

0 of 0 people found the following review helpful. Two StarsBy YellaroseIt didn't fit my need.6 of 7 people found the following review helpful. A great guide bookBy Donald J. BergThis is a general primer on building all types of fences and on growing hedges. The section on stone and masonry is particularly thorough. Great illustrations by Liz Buell, straightforward text and detailed photographs of works in progress make this a good resource for both novice and experienced builders.15 of 17 people found the following review helpful. Not great if you don't know what you want.By A CustomerI found the book to be alright in terms of it teaching the fundamentals of how to construct

different types of fences, but in reality, some of the types of fences discussed are not all that practical (i.e., stone and brick fences). If you are merely looking for numerous ideas for one style of fence (i.e., picket fence), you are better off looking elsewhere.

John Vivian, well-known expert on many aspects of country living, here gives all the how-to you'll need to build beautiful, professional-looking fences. He provides detailed, step-by-step instructions, diagrams, and photographs, along with complete materials lists. A gem of a how-to book!
