Chris Peterson : Building with Secondhand Stuff, 2nd Edition: How to Reclaim, Repurpose, Re-use Upcycle Salvaged Leftover Materials before purchasing it in order to gage whether or not it would be worth my time, and all praised Building with Secondhand Stuff, 2nd Edition: How to Reclaim, Repurpose, Re-use Upcycle Salvaged Leftover Materials:

0 of 0 people found the following review helpful. Five Stars By Linda A.love it 1 of 1 people found the following review helpful. Get your hammers, Ladies! By Terry Pearson I'm one of those people who can instantly look a piece of junk , love it, and know how I want to repurpose it. Christopher Peterson's book is a treasure trove of helpful

information, ideas, and projects. What I love best about the entire book is it gives me information I would never have thought or known about but is necessary to know when you are upcycling salvaged materials, especially if you are going to resell it. Were you aware that there are different stamps on pallets to identify which ones were safe to use for home and garden products? That a stamp can tell you the origin of the pallet? That you need to avoid pallets stamped with MB because it stands for Methyl Bromide which is a banned insecticide? Or that colored pallets often signify that the pallet was used by a pool supplies manufacturer which means it carried chemicals? Do you know how to clean salvaged brick. How about lumber? Can you identify different types of wood or pipe of brick? Do you know how to re-silver a mirror? You will after reading this. Best of all about the book is my favorite part; upcycling. Filled with numerous re-purposing ideas, the ultimate is the Old Door Greenhouse. I originally had my designs on a greenhouse from another book but have had that on the back burner until I see if my Association will permit me to build this one instead. In my opinion, it is reminiscent of an English Greenhouse and has that quaint cottage appeal. Throughout the book there are Safety First tips on various subjects. These are very helpful to know before you start any project so be sure and read them to avoid any injury. Two Thumbs Up!

From Craig's List, your basement, and estate sales, you can salvage what you need to upcycle all kinds of cool things. You can build tables, install vintage hardwood floors and salvaged windows, mason reclaimed stone walls, and do much more using free or very inexpensive, high-quality, reconditioned materials. You'll encounter opportunities to upcycle usable building materials everywhere. By using *Building with Secondhand Stuff*, 2nd edition, good judgment, and a few salvage tricks, you can take advantage of these chances to gather free (or nearly free) project supplies and put them to work in your house. This second edition of the best-selling book includes new projects such as a pallet chair, pallet table, chalkboard message door, door-backed island, and a reclaimed window greenhouse.

About the Author Chris Peterson is the author of numerous books on home improvement and gardening, including *Deck Ideas You Can Use*, *Black Decker Complete Guide to Garages*, and *Square Foot Gardening: Growing Perfect Vegetables*, all published by Cool Springs Press.
