HaleyBungalow Nation is a colorful and interesting look at a distinctly American house-type: the bungalow. Imported from England by way of India, bungalows began in California and spread eastward across the land as a home for Everyman... even today, bungalows built in the mid-1900's stand a testament to a philosophy that prized organic and authentic building materials in harmony with nature: understated but beautiful, Bungalow Nation is a must for anyone who loves bungalows. It is filled with pictures that show the distinctive features of bungalows, from inglenooks to breakfast nooks, to the period tile used around fireplaces, to explanations about building materials and styles of bungalows from all across the nation.6 of 6 people found the following review helpful. Craftman homesBy C. PittmanSeveral years ago I had the chance for a college geography class to write a paper on craftsman/bungalow style homes in America. This book is what I based much of my research on. The color pictures are simply stunning - from several regions throughout the US, including California, Seattle, and even Minnesota. The photographs from the inside of the homes showed the rich textures of the wood cabinetry, floors, simply beautiful woodwork, brick fireplaces, stained glass cabinet doors, and so forth. It would be suitable as a coffee table book or one to use in your own personal library.2 of 2 people found the following review helpful. More than three hundred full-color photographs showcase the charming appeal of the bungalow style of design, featuring a variety of stylistic treatments--from Colonial Revival to Craftsman to Tudor--that exemplify the best in decorating for bungalow bedrooms, kitchens, living rooms, and baths. 15,000 first printing.

From Publishers Weekly Built mostly during the first quarter of the 20th century, bungalows have been experiencing a kind of renaissance amongst today's homeowners-especially the first-timers. In this celebration of the architectural form, Maddex (*American Bungalow Style*) visits 75 bungalows throughout the country, including L.A., Seattle, Chicago and D.C. Hers is a warmly told history, which guides the reader from neighborhood to neighborhood and introduces them to the bungalow's many architectural styles--from Federal to Arts Craft to Spanish. She explains that bungalows were originally "designed for California's outdoor lifestyle," but eventually, "Sears, Montgomery Ward, Aladdin, Gordon Van-Tine, Lewis Homes and others all made bungalows a mainstay among their ready-to-assemble houses." In subsequent chapters, she explores the better-known bungalow architects, such as California's Ellsworth Storey and Seattle's Willatsen and Byrne. Beautiful photos by Vertikoff enable the reader to fully experience the quaint charm of the bungalow exterior, and the warmth of the its wood-detailed interiors and light-filled kitchen nooks.
