Bunny Williams : Bunny Williams Scrapbook for Living before purchasing it in order to gage whether or not it would be worth my time, and all praised Bunny Williams Scrapbook for Living:

Bunny Williams is renowned for her glamorous design and attention to every little detail in her clients homes. Using her incredible knowledge of design and decor, and drawing on her wealth of experience, Williams takes the reader through several homes room by room, showing creative ways to organize and add personal touches. From dining rooms (place a chest of drawers near the dining table to store flatware, napkins, place mats, and votives) to lighting (place sconces on the wall at eye level to cut the glare from ceiling lights), and pets (find interesting flat-bottom bowls for watersmall Chinese fish bowls or the bottom of a porcelain tureen work perfectly!), Williams empowers the reader with her practical and inspiring tips for making a house a home. Praise for Bunny Williams' Scrapbook for Living: "chock full of beautiful, instructive pictures . . . many nuggets of practical advice" -- The New York Times
