I first saw her work in Architectural Digest, I was sold then. This book is unbelievably a good read, the text and the photographs were spectacular. No matter what your level of design, this book will help you overcome any obstacles of whatever room(s) you want to design and decorate. She resolves all the guess work. Although I'm not able to afford this designer, her tips make me feel that I have my own personal Designer right beside me when making design

Great ideas plus beautiful designs By S. Harrison I absolutely love this book. I am very excited about the purchase of my first home and going through this book keeps the excitement going. It has given me so many great ideas, I don't know which room I want to work on first! But the book is also very practical. Cecil tells you from step 1...get to know your space. So that's exactly what I did. I walked around my living room w/a little note book and my digital camera. Another great idea is what Cecil calls a "Look Book". Put all those little cut-outs from magazines, those color cards from the paint store, and anything that you consider inspiration for your personal style. As time goes on, I've begun to see exactly what MY taste is and how I would like to design each room. Cecil Hayes - I love her style and I love this book!
