Amazing book By RSVI'm new to gardening and I'm so happy I read this book before starting my first garden this spring. I learned so many valuable techniques, plus the reasoning and proof behind them, that I know I'll have more success than I would have otherwise. Easy to read, and understand with great photos. 2 of 2 people found the following review helpful. Knowledge I Need By SOEXCITEDUSAThis is a great home gardening book for those of us who grew up in the city but now want to do a little fresh food in suburbia. Great pictures and lots of common

sense. Enjoy!

Charles Dowding, the master of no-dig gardening, developed his highly successful methods of vegetable growing through 30 years experience of growing and selling vegetables and extensive experiments. Through his courses at Lower Farm in Somerset and his three previous books, he has won a keen following. Beginners and experienced veg growers alike find that his methods work and that he opens their minds to new possibilities. Now he has distilled the essence of his courses and ideas into one book. In it you will find out how to grow vegetables the Charles Dowding way. Charles Dowding's Vegetable Course is both a straightforward guide to success and an inspiring source of ideas for achieving a more productive vegetable garden for less effort.

This book is essential reading to gardeners of all abilities. The advice given is honest, truthful and fresh without trying to impress its readers and that is what makes this book so impressive. It is the best all round garden book I have read in years and worth every penny of the cover price. This is definitely no ordinary run of the mill book and should be on every gardener's bookshelf even if you have to beg, steal or borrow it.
