Louise Krautheim I liked the way the author had broken down the chapters to cover various areas and rooms of the home based on style; i.e. traditional, romantic, serene, etc. It was very helpful in avoiding common mistakes made by most persons when decorating their home. However, I believe this book would have been more appealing if more photos were shown of the various areas being discussed and how to incorporate the various styles. I bought this book based on prior reviews and was a little disappointed due to the lack of photos which makes the reality of these projects much more interesting. Good ideas, with few photos.
