I adored her on "Million Dollar Decorators" (so wish it could return) and have all her books. Each one is inspiring. Sure makes me want to do some work on my space!2 of 2 people found the following review helpful. Another great one from Kathryn!By Lynn in TulsaLove all her books, especially Summers in France and the one about the Libby House in SoCal. This book is no exception - some advertising for her fabrics, but I think that's in response to requests for more info on the fabrics, from previous books. I really admire her creativity and lack of pretension. Waiting for her next release, and I'm sure will carry it.0 of 0 people found the following review helpful. This is the wonderful British textile and home interior designer. Thanks for writing the book! I really enjoyed it.
