**Dermot Egan : Codesigning Space: TILT** before purchasing it in order to gage whether or not it would be worth my time, and all praised Codesigning Space: TILT:

TILT are a London-based design and architecture practice that actively engages communities in designing and making their spaces. Founded by designer Oliver Marlow and social entrepreneur Dermot Egan, TILT has created a unique codesign methodology that transforms the way people interact with each other and the spaces around them. Participants are encouraged to explore the role of objects and furniture within their space and understand their impact on culture and behaviour. TILT's codesign approach is having a significant impact on community building, deciphering complex project briefs, prototyping architecture and delivering enabling spaces. Through their trans-disciplinary

design team, including architects, furniture designer/makers, graphic designers and technologists, TILT are challenging the traditional role of the architect in space design. Codesigning Space is an introduction to this fresh approach to designing spaces, placing TILT's work in the context of the codesign movement and offering an introduction to their methodology and projects. Referencing case studies from different industries, including Health, Workplace, Coworking and the Arts, the book demonstrates the power of codesign as a method to design spaces, highlighting its potential to engage communities to purposefully shape environments and influence their culture.

Ten thought-provoking essays are followed by 75 pages of practical strategies such as Image Blast, a way of collecting input by crowd-sourcing mood boards each illustrated with successful projects. These take-home ideas make this 144-page paperback from Artifice a valuable resource for creating an outstanding space. Azure Magazine From the Inside Flap Codesigning Space is an introduction to this fresh approach to designing spaces, placing TILT's work in the context of the codesign movement and offering an introduction to their methodology and projects.
