James A. Young, Cheryl G. Young : Collecting, Processing and Germinating Seeds of Wildland Plants before purchasing it in order to gauge whether or not it would be worth my time, and all praised Collecting, Processing and Germinating Seeds of Wildland Plants:

31 of 31 people found the following review helpful. Excellent, useful info. Worth the wait to get it. By charliewb@hotmail.com Excellent source of info on seed germination applicable to the novice and expert. What I liked best were the succinct pretreatment and planting directions for a wide variety of trees and shrubs. I also found the information on collecting and storing seeds immediately useful and valuable. 0 of 1 people found the following review helpful. Five Stars By dayj3297 Great resource

Gardeners who are intrigued by the possibilities of native plants will find this treatment of seed collection and germination from native annuals to trees an invaluable resource.

About the Author Dr. James A. Young, a research scientist for the U.S. Department of Agriculture, has achieved worldwide recognition and respect among professional natural resource managers as an expert on native North American seeds. His wife and coauthor, Cheryl G. Young, has been closely associated with this work, organizing and compiling the diverse literature and findings from throughout North America.
